

18-Plate Disc Harrow, 1,900mm

The 18-Plate Disc Harrow is a heavy-duty tool featuring 9 front plates and 9 rear plates giving a total of 18 plates, each with a diameter of 550mm and designed to cut a track width of 1900mm. It is suitable for tractors ranging from 70hp to 100hp.

The harrow effectively breaks up hardened and impervious surfaces, crushes and spreads straw, and shatters soil after tillage. It assists in preparing land while preserving soil moisture and can be utilized on cultivated land as a tillage harrow, serving as an alternative to ploughing.

With its high harrowing capacity, it provides efficient power utilization and excels at cutting and shattering soil, leveling surfaces, and loosening soil post-harrowing. These harrows are well-suited for heavy clay, wasteland, and weedy fields. The harrows feature a robust combination of a rigid rectangular frame and a welded tube structure.

Hitch	3 Point Linkage, Category 1
Frame Construction	SHS Box Section Steel
Number of Plates	18
Plates Per Row	9
Number of Rows	2
Tractor Power Required	70HP - 100HP
Machine Width	2,000mm
Working Angle	Adjustable
Cutting Width	1,900mm
Plate Diameter	550mm
Plate Spacing	220mm

 Category #1
3 Point Linkage
