

'Soft Hands' Bale Grab

The dedicated EuroHitch 'Soft Hands' Bale Grab suits a wide variety of bales especially plastic wrapped or typical twine tied. The unit utilizes the standard EuroHitch fitting, though we encourage you to check your frond loader as there can occasionally be variations in measurements. The high capacity hydraulic ram ensures a firm grip on the bale, while multiple grease-points provide smooth trouble-free operation. Rear 'legs' provide proper support when un-hitched and sitting on the ground, while also making hitching much easier. Featuring robust, fully welded tubular steel construction, this greatly reduces the risk for damage to bales. This handler utilizes your tractor's existing 4-in-1 hydraulic couplers, so hookup is a breeze. Large, tubular hands means you can securely grab bales without over squeezing, deforming or damaging the bale. With fully controllable hydraulic operation, which gives the operator flexibility in loading - easy access between closely stacked bales. Recommended for use on skid steer loaders, tele-handlers and of course, tractor loaders.

Hitch	EuroHitch
Requirements	Front End Loader with 4-in-1 connectors
Hydraulic	Yes
Construction	Fully Welded Steel
Load Capacity	800kg (or capacity of loader, whichever is less)
