

Hydraulic Offset Flail Mower

Flail mowers (also known as a mulching mowers) are an extremely versatile unit capable of handling lawn grass right through to long heavy grass, sticks undergrowth vine mulching, pasture topping, roadside maintenance and debris. Flail mowers use hammer blades that are mounted on a horizontal shaft and perform extremely well in long grass and rough areas mulching grass, sticks etc as it cuts. The high strength hammers can swing back in either direction making them extremely durable when hitting solid objects unlike lighter "Y" blades found on many other brands. This mower is also fitted with safety flaps to prevent debris being thrown and includes a support leg for easy storage, and easier hitching.

**GRASS
MASTER**

Hitch	3 Point Linkage
Tractor Power Required	40 HP +
Width	6ft (1,800mm) (1600mm Cutting Width)
