

Skid Steer Rock Breaker

When raw power and smart engineering collide, you get a rock breaker that dominates the job site. With the highest power-to-weight ratio in its class, this beast delivers maximum impact force without slowing you down. At its core is a patented valve system—uniquely designed for faster response, improved efficiency, and consistent performance, hit after hit. Built with a simple hydraulic circuit and extra-large oil passages, this breaker runs cooler, smoother, and more reliably—even under the most demanding conditions. Fewer components mean less maintenance and more uptime, so you stay productive instead of stuck in the shop. Thanks to its fully enclosed frame with advanced noise and vibration dampening, you'll feel the difference in comfort and control, not in your arms or ears. This isn't just a hydraulic breaker—it's your new go-to for high-impact, low-hassle demolition.

Hitch	Universal Skid Steer
Type	Rock Breaker
Length	330mm
Width	660mm
Height	1,000mm
Tip Diameter	53mm
Machine Weight	260kg
